

Don't lose your patients and your patience by waiting for the November election and for COVID-19 to "magically disappear."

Donald Trump famously asked "what have you got to lose?" Joe Biden and a blue wave of Democrats have the answer:
your patients' insurance, health, and lives!

It is critical for YOU – as health care professionals - to speak out to colleagues and to those with political influence **NOW**.

Don't let the upcoming election be a cause for regret because you didn't take action. Our focus is to organize health professionals in swing states to help Joe Biden win the electoral votes of Arizona, Florida, Georgia, Michigan, North Carolina, Pennsylvania, and Wisconsin.

Consider volunteering 1-2 hour per month with Ask Nurses & Doctors and we will collaborate with you to **create an effective action plan for change that you'll be comfortable with and respects your time constraints.**

Trump's Health Plan

Biden's Health Plan

Repeal the Affordable Health Care plan and replace it with 4 more years of more talk about "something better." This will end pre-existing condition restrictions, remove young adults up to the age of 26 from their parents' plans, and end insurance coverage entirely for 20 million more people.

Continue shifting responsibility for the late start and flawed approach to controlling the COVID-19 pandemic and protecting patients, health care workers and the public.

Keep and strengthen the Affordable Health Care plan protections for everyone, including the tens of millions of Americans who have now lost their jobs, insurance, earning potential, relatives and friends.

Keep insurance for the under 26-year-olds – among them factory, restaurant and other service workers who've lost their jobs or suffered pay cuts and are facing a prolonged, deep, recession.

Do not exclude patients with pre-existing conditions from coverage.

Expand upon (not drastically cut) the millions of people who now have coverage.

Pay for prevention.

Add a public option to the insurance exchanges rather than driving people towards poverty, debt, and a reliance on Medicaid.

Change the basis for calculating patient copays and deductibles to make all plans bought on the insurance exchanges more affordable.

And so much more – see joebiden.com/healthcare for the entire plan.
