

Nurses!

You can help elect a President who cares about you and your patients.

Ask Nurses & Doctors LLC
Norbert Goldfield, M.D., Founder
413-800-2680 | norbert@asknursesdoctors.com

Donald Trump famously asked “what have you got to lose?” Joe Biden and a blue wave of Democrats have the answer: a caring, better functioning healthcare system.

YOU are needed now – as trusted advocates for your patients - to speak to colleagues and those with political influence.

Take action. Help organize fellow health professionals win the electoral votes in swing states --- Pennsylvania, Arizona, Florida, Georgia, Michigan, North Carolina, and Wisconsin.

Volunteer just 1-2 hours in each of the next 4 months with Ask Nurses & Doctors and we will collaborate with you to create an effective action plan for change that you'll be comfortable with and respects your time constraints.

CONSIDER TRUMP'S RECORD...

- ✗ Continues shifting responsibility for a delayed start and takes an unscientific approach to controlling the COVID-19 pandemic – optional masks and social distancing, slowed down testing, imaginary “cures” -- leading to 50,000 thousand extra deaths and still counting.
- ✗ Attempts to repeal the Affordable Health Act, ending coverage for 23 million people, while replacing it with years of talk about “something better.”
- ✗ Puts politics before public health, justice, and health equity.

... & COMPARE IT TO BIDEN'S PLAN.

- ✓ Strengthen the Affordable Health Care Act for all Americans - stop driving people towards poverty, debt, and reliance on Medicaid.
- ✓ Keep insurance for the under 26-year-olds — among them nurses' children, medical assistants, factory, restaurant and other service workers who've lost their jobs or suffered pay cuts and are facing a prolonged, deep, recession.
- ✓ Add a public option to compete with corporate health plans and lower patient copays and deductibles

And so much more — see joebiden.com/healthcare for the entire plan.
